Taiwan Employment Outlook

The Manpower Employment Outlook Survey for the third quarter 2009 was conducted by interviewing a representative sample of 1,091 employers in Taiwan. All survey participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of September 2009 as compared to the current quarter?”

Employers in Taiwan forecast a respectable level of hiring activity for Quarter 3 2009. With 20% of employers expecting to grow headcount, 8% predicting a decrease and 69% anticipating no change, the Net Employment Outlook stands at a positive +5% after seasonally adjusted.

Throughout this report, we use the term “Net Employment Outlook.” This figure is derived by taking the percentage of employers anticipating total employment to increase, and subtracting from this, the percentage expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook.

Once seasonal adjustments are applied to the data, the Outlook is a more cautious +5%. Nevertheless, there has been a considerable 15 percentage point improvement quarter-over-quarter. Year-over-year, the Outlook is 16 percentage points weaker.

From this point forward, all data discussed in the commentary is seasonally adjusted, unless stated otherwise.

	Increase	Decrease	No Chang	Don't know	Net Employment Outlook	Seasonally Adjusted
	%	%	%	%	%	%
3rd Quarter 2009	20	8	69	3	+12	+5
2nd Quarter 2009	10	15	70	5	- 5	- 10
1st Quarter 2009	14	20	64	2	- 6	- 4
4th Quarter 2008	26	9	61	4	+17	+22
3rd Quarter 2008	31	6	58	5	+25	+21

Sector Comparisons

Employers in all six industry sectors forecast headcount growth during Quarter 3 2009. The most favorable hiring climate is likely to be in the Transportation & Utilities sector, where the Net Employment Outlook is an upbeat +19%. Employers in the Services sector anticipate a modest increase in staffing levels with an Outlook of +9%. Elsewhere, employers give more cautious predictions for headcount growth, with the most uncertainty reported by Mining & Construction employers, with an Outlook of +1%.

Quarter-over-quarter, hiring intentions have strengthened in four sectors. The most considerable improvements are reported in the Services sector Outlook, by 18 percentage points, and in the Manufacturing sector

Outlook, by 17 percentage points. The only sector with a weaker Outlook is Finance, Insurance & Real Estate, where there has been a considerable 9 percentage point decrease.

Year-over-year, the Outlook has improved by a considerable 17 percentage points in the Transportation & Utilities sector, but elsewhere, employers report weaker Outlooks. A sharp decline of 23 percentage points is reported by Finance, Insurance & Real Estate sector employers, and there is a steep decrease of 20 percentage points in the Outlook for the Wholesale & Retail Trade sector.

Note: Employers in the Public Administration/Education sector have not been included in this survey

Finance Insurance & Real Estate +10(+5)% Manufacturing +13(+4)%

Employers in the sector forecast their weakest hiring intentions since the survey began in Quarter 2 2005, with a Net Employment Outlook of +5%. Although the Outlook indicates that there will be some modest headcount growth in Quarter 3 2009, it weakens by a considerable 9 percentage points quarter-over-quarter. Year-over-year, the Outlook has declined by a steep 23 percentage points.

Employers in the sector forecast some moderate gains in headcount for the upcoming quarter, with a Net Employment Outlook of +4%. Quarter-over-quarter, hiring intentions have strengthened considerably, with the Outlook increasing by 17 percentage points. Year-over-year, however, the Outlook is a considerable 14 percentage points weaker.

Mining & Construction +8(+1)%

Sector employers anticipate a subdued hiring environment in Quarter 3 2009, reporting a Net Employment Outlook of +1% for the second quarter in succession. Year-over-year, the Outlook is a considerable 12 percentage points weaker.

Services +13(+9)%

Cautiously optimistic hiring plans are reported by employers in the sector, with a Net Employment Outlook for Quarter 3 2009 of +9%. Hiring intentions strengthen by comparison with the previous quarter's Outlook by a considerable 18 percentage points, although year-over-year the Outlook is 11 percentage points weaker.

Transportation & Utilities +25(+19)%

Sector employers forecast a positive hiring climate in Quarter 3 2009. The Net Employment Outlook of +19% is the strongest in the sector since Quarter 3 2006, and the Outlook improves both quarter-over-quarter and year-over-year, by 9 and 17 percentage points, respectively.

Wholesale Trade & Retail Trade +7(+4)%

There will be some modest headcount growth in the sector during Quarter 3 2009, according to employers. The Net Employment Outlook stands at +4%, reflecting a moderate 6 percentage point quarter-over-quarter improvement. Year-over-year, however, the Outlook has declined by a sharp 20 percentage points.

Global Employment Outlook

Over 70,000 employers have been interviewed across 34 countries and territories to measure anticipated employment trends* between July and September 2009. Employers in Hungary are surveyed for the first time this quarter, expanding the reach of the Manpower Employment Outlook Survey to four of the most important economies in Eastern Europe. Employers in 11 of the 34 countries and territories Manpower surveyed expect to add to their workforces in Quarter 3 2009. However, where year-over-year comparisons can be made, hiring expectations are decidedly weaker in all countries and territories surveyed compared to 12 months ago. Notably, employers in 17 countries and territories are reporting the weakest hiring plans since the surveys were established there by Manpower. Although weaker than historical patterns, employment prospects are most favorable in India, Norway, Poland, Peru, Singapore and Taiwan. Employer hiring expectations are weakest in Ireland, Spain, Greece, Romania, Italy, Japan and the United Kingdom.

On a regional basis, employment prospects are mixed; a general downward trend continues, with Outlooks declining in all countries and territories in a year-over-year comparison. However, there are some indications of labor markets beginning to stabilize. In a quarter-over-quarter comparison, Net Employment Outlooks have improved in 12 countries and territories, and have remained steady in five others. In the Asia Pacific region, job prospects have improved in four of the eight countries and territories surveyed. In the Europe, Middle East & Africa (EMEA) region, Outlooks decline from three months ago in eight of 17 countries where quarter-over-quarter data is available, with employers in Norway, Ireland, the Czech Republic, Italy, Poland, Spain and Sweden anticipating an improved hiring pace. In the Americas, employers in Peru remain cautiously optimistic; however, employers in each of the region's other seven countries report negative hiring intentions in the next three months.

* Comments in this section are based on seasonally adjusted data where available.

1. Number in parentheses is the Net Employment Outlook when adjusted to remove the impact of seasonal variations in hiring activity.

Survey Respondents by Region

Research for the Quarter 3 2009 Manpower Employment Outlook Survey involved surveying over 70,000 human resource directors and senior hiring managers from public and private organizations worldwide: 55% of the respondents came from eight countries in the Americas; 23% from 18 countries in EMEA; and 22% from eight countries and territories across Asia Pacific.

International Comparisons – Asia Pacific

Nearly 16,000 interviews have been conducted across the Asia Pacific region to measure anticipated hiring activity between July and September 2009.

Employer confidence is improving in some labor markets, with positive hiring intentions reported by employers in five of the eight countries and territories surveyed. Notable improvements are reported by employers in Singapore and Taiwan where the Outlooks are considerably stronger compared to three months ago. However, the year-over-year hiring pace

is expected to remain decidedly weaker throughout the region, with employers in China, India and Japan reporting their least optimistic forecasts since the surveys began in these countries. In India's key Service industry sector, 11 percent of the employers indicated they would reduce staff in response to weaker demand from offshore clients, contributing to the moderately weaker national forecast.

Despite the relatively weak forecast for the Indian market, employers there remain the most optimistic in the region. Elsewhere, employers in Singapore, Taiwan, China and Australia are anticipating the region's most favorable hiring activity for the upcoming quarter, although the Outlooks remain below historical patterns.

India joined the survey in Q3 2005.

Japan

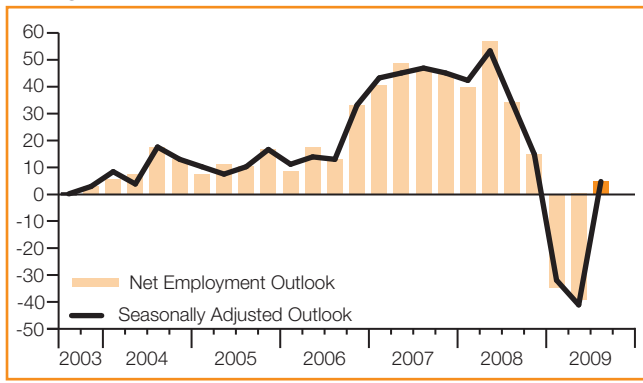

New Zealand

New Zealand joined the survey in Q2 2004.

Singapore

Taiwan

Taiwan joined the survey in Q2 2005.

International Comparisons – Americas

Nearly 39,000 interviews have been conducted across Argentina, Canada, Colombia, Costa Rica, Guatemala, Mexico, Peru and the United States to measure employment prospects for Quarter 3 2009.

Negative Net Employment Outlooks are reported in seven of the eight countries surveyed. Compared to three months ago, the hiring pace is expected to slow in every country except Mexico, with employers across all Mexican industry sectors expecting to take on more staff in the next three months. The hiring

pace is also expected to slow from 12 months ago in each of the seven countries where year-over-year data is available. The subdued hiring pace expected in the United States remains unchanged from the second quarter.

Although, employers in Peru are forecasting the only positive hiring intentions in the region, the Outlook is the country's least optimistic reported to date. Third-quarter hiring intentions are weakest in Argentina, Canada and Mexico. In addition to Peru, the Outlooks for Argentina, Colombia, Costa Rica and Guatemala are the least optimistic reported to date, and for the second consecutive quarter employers in the United States report the gloomiest Outlook since the 1982 recession.

International Comparisons – EMEA

Nearly 16,000 interviews have been conducted with employers across 18 countries to measure anticipated employment trends for Quarter 3 2009.

Of the countries surveyed in the Europe, Middle East and Africa (EMEA) region, only employers in Norway, Poland, Switzerland, South Africa and the Czech Republic are reporting positive, but modest third-quarter hiring activity. Hungarian employers are surveyed for the first time this quarter and, like the majority of their counterparts in the region, are reporting negative hiring expectations. Where year-over-year comparisons are possible, all countries expect

cutbacks. Where quarter-over-quarter comparisons can be made, the forecasts improve in seven of 17 countries. Job prospects in the Manufacturing industry sector have continued to deteriorate across Continental Europe and South Africa and are contributing to the first negative hiring forecast of German employers in three years.

Employers in Norway and Poland are forecasting the most favorable hiring activity, while employers in Ireland and Spain are the least optimistic for the quarter ahead. Furthermore, employers in Austria, Switzerland, France, Greece, the Netherlands, Romania, South Africa and the UK report their least optimistic hiring plans since the surveys were launched in these countries.

South Africa joined the survey in Q4 2006.

About the Survey

The Manpower Employment Outlook Survey is conducted quarterly to measure employers' intentions to increase or decrease the number of employees in their workforce during the next quarter. The survey has been running for more than 45 years and is one of the most trusted surveys of employment activity in the world. Various factors underpin the success of the Manpower Employment Outlook Survey:

Unique: It is unparalleled in its size, scope, longevity and area of focus.

Projective: The Manpower Employment Outlook Survey is the most extensive, forward-looking employment survey in the world, asking employers to forecast employment over the next quarter. In contrast, other surveys and studies focus on retrospective data to report on what occurred in the past.

Focused: For more than four decades, the survey has derived all of its information from a single question.

Independent: The survey is conducted with a representative sample of employers from throughout the countries in which it is conducted. The survey participants are not derived from Manpower's customer base.

Robust: The survey is based on interviews with over 70,000 public and private employers across 34 countries and territories to measure anticipated employment trends each quarter. This sample allows for analysis to be performed across specific sectors and regions to provide more detailed information.

Methodology

The Manpower Employment Outlook Survey is conducted using a validated methodology, in accordance with the highest standards in market research. The research team for the 34 countries and territories where the survey is currently conducted includes Manpower's internal research team and Infocorp Ltd. The survey has been structured to be representative of each national economy. The margin of error for all national, regional and global data is not greater than +/- 3.9%, Taiwan is not greater than +/- 3.0%.

Survey Question

All employers participating in the survey worldwide are asked the same question, "How do you anticipate total employment at your location to change in the three months to the end of September 2009 as compared to the current quarter?"

Net Employment Outlook

Throughout this report, we use the term "Net Employment Outlook." This figure is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook.

Seasonal Adjustment

Seasonal adjustments have been applied to the data for Australia, Austria, Belgium, Canada, China, France, Germany, Hong Kong, India, Ireland, Italy, Japan,

Mexico, Netherlands, New Zealand, Norway, Singapore, Spain, Sweden, Switzerland, Taiwan, the United Kingdom and the United States to provide additional insight into the survey data. These adjustments make it possible to review the data without the employment fluctuations that normally occur at the same time each year, thus providing a clearer picture of the data over time. Manpower intends to add seasonal adjustments to the data for other countries in the future, as more historical data is compiled. Note that in Quarter 2 2008, Manpower adopted the TRAMO-SEATS method of seasonal adjustment for data.

History of the Survey

1962 1st generation of the Manpower Employment Outlook Survey launched in the United States and Canada.

1966 Manpower's UK operation launches the equivalent of the United States survey, naming the report the Quarterly Survey of Employment Prospects. The survey adopts the same forward-looking research format as the United States survey and is the first of its kind in Europe.

1976 2nd generation of Manpower's Employment Outlook Survey launched in the United States and Canada. Research methodology is updated to evolve with advancements in the field of market research.

2002 Manpower UK's Quarterly Survey of Employment Prospects is updated to adopt an enhanced research methodology. Manpower's operations in Mexico and Ireland launch the survey in their respective countries.

2003 3rd generation of the Manpower Employment Outlook Survey is launched, expanding the program to a total 18 countries and territories worldwide: Australia, Austria, Belgium, Canada, France, Germany, Hong Kong, Ireland, Italy, Japan, Mexico, Netherlands, Norway, Singapore, Spain, Sweden, United Kingdom and United States.

2004 Manpower operations in New Zealand launch the Manpower Employment Outlook Survey.

2005 Manpower operations in China, India, Switzerland and Taiwan launch the Manpower Employment Outlook Survey.

2006 Manpower operations in Costa Rica, Peru and South Africa joined the survey program. Surveys in Australia, Austria, Belgium, France, Germany, Hong Kong, Ireland, Italy, Japan, Mexico, Netherlands, Norway, Singapore, Spain and Sweden add seasonally adjusted data in the third quarter.

2007 Manpower operations in Argentina launch the Manpower Employment Outlook Survey. The survey in New Zealand adds seasonally adjusted data in the first quarter.

2008 Manpower operations in the Czech Republic, Greece, Guatemala, Poland and Romania joined the survey program. China and India add seasonally adjusted data in the second quarter. Switzerland and Taiwan add seasonally adjusted data in the third quarter.

2009 Manpower operations in Hungary are surveyed for the first time this quarter, expanding the reach of the survey to four of the most important economies in Eastern Europe.

About Manpower Inc.

Manpower Inc. (NYSE: MAN) is a world leader in the employment services industry; creating and delivering services that enable its clients to win in the changing world of work. Founded in 1948, the \$22 billion company offers employers a range of services for the entire employment and business cycle including permanent, temporary and contract recruitment; employee assessment and selection; training; outplacement; outsourcing and consulting. Manpower's worldwide network of 4,200 offices in 82 countries and territories enables the company to meet the needs of its 400,000 clients per year, including small and medium size enterprises in all industry sectors, as well as the world's largest multinational corporations. The focus of Manpower's work is on raising productivity through improved quality, efficiency and cost-reduction across their total workforce, enabling clients to concentrate on their core business activities. Manpower Inc. operates under five brands: Manpower, Manpower Professional, Elan, Jefferson Wells and Right Management. More information on Manpower Inc. is available at www.manpower.com.
